Optimat

The perfectionist among automatic feeders
Optimat

The perfectionist among automatic feeders

Optimat Junior
Starting weight: 6 kg
Finishing weight: 30 kg
Feeding points: 6 - 8
Animals/feeder: 30-50
Storage tank capacity: 70 l
Water supply: aqua level feeder
Material– divider: stainless steel
Material– trough system: stainless steel/PE
System height: 92-111 cm
System width: 53 cm

Optimat Finisher
Starting weight: 25 kg
Finishing weight: 120 kg
Feeding points: 6-8
Animals/feeder: 24-40
Storage tank capacity: 95 l
Water supply: aqua level feeder
Material– divider: stainless steel
Material– trough system: stainless steel/PE
System height: 92-120 cm
System width: 76 cm

Trough element
• Round trough with separate water section
• The special, patented trough form with separate feeding section and water recesses ensures optimum functionality while avoiding feed losses and providing optimum feed hygiene as a result
• Water supplied with aqua level feeder

Feed
• Powder or pelleted feed

Technical data
• Stable (robust and solid) frame construction
• Robust dosing mechanism
• Ingeniously integrated water circuit
• Total capacity 101 litres
• Easy to clean
• Straightforward quantity adjustment
• Up to 50 animals can be fed at the same time
• Round feeding trough made of stainless steel
• 8 feeding points for simultaneous, quiet and stress-free feeding times
• Reliable prevention of feed bridges forming in the tank
• Minimum feed losses
