Robust automatic wet feed feeder for your piglets and finishers

Technical data
- Dry feed for distribution
- Solid, robust design made of stainless steel and plastic
- Supplies animals with 6-120 kg liveweight and a max. number of 40 animals with no trouble at all
- Straightforward operation and easy to clean
- 2 water feeders
- Straightforward quantity adjustment

Feed
- Wet or pelleted feed

Trough element
- With separate water recesses
- The special, patented trough form with separate feeding section and water recesses ensures optimum functionality while avoiding feed losses and undesired operation of the nipple drinkers, providing optimum feed hygiene as a result
